

BOHDAN KRUTSKO

ARCHITECT

Through years of practicing professionally as an architect, I have comprehensive experience as technical and design architect. Working with concept development and competitions both nationally and internationally have given me great knowledge to work in a team closely together to create the best design possible. I understand the nature and difficulty of a task, and can manage time when deadlines are approaching. But my unique advantage is the attention to the details and the ability to make graphic presentation of the project.

Date of birth:
1979-04-24
